Lightning strikes twice; Friggs wins 1979 Truman

By TOMMY TORLAY Special Assignments Editor

Lightening has indeed struck twice at UTM over the past three years.

Davld Griggs, a political science major from Union City, won the distinguished Harry S. Truman Scholarship and followed in the footsteps of another UTM student, Steve Stafford, who was the first Tennessee student to win the award two years ago.

"The Harry S. Truman Scholarship award is a national award given to one person per state," sald Griggs, who plans to pursue a career in public service or politics. "The award money is given by authority of Congress and will pay up to \$5,000 a year for school.

According to Griggs all 27 colleges in Tennessee sponsor an applicant for the coveted award and the requirements are: an essay of 600 words or less that analyzes a particular public policy issue, high school transcript and a un-dergraduate scholastic record; and three letters of recommendation. The letters must be written by a faculty member in the student's field study and one must be written by another person who can speak on the student's potential for a career in public service. An administrative officer of the University prepares the third letter.

"There is a screen for the state competition and the student must have outstanding academic qualifications," said professor of political science, Dr. Theodore Mosch.

Griggs, a sophmore, has seen active in the SGA

Registration system subjected to survey

By BILL ROGERS Staff Reporter

Last week's computer registration survey, evaluating the advantages and disadvantages of computer registration, is in the process of being collected and organized, according to Emily McCiain, Registrar.

"It will be about two or three weeks before we get the final results," McClain sald.

The survey was designed to report the strengths and weaknesses of the present registration system and allow the faculty and students to comment on their opinions of the present system.

The survey was administered to various faculty members, administrators and approximately 10 percent of the student body asking them for comments on the present registration system and if they would be opposed to returning to the "arena-type"

of registration.
The old 'arena-type' registration required the following steps to be followed in order to enroll in classes at

I. Start by waiting in line outside the University Bailroom until allowed to enter; state full name once inside. Seniors could register with the first group. (The rest registered aiphabetically rather than by number of hours passed) Approximate time required: 0-30 minutes.

This week in The Pacer

To draft or not to draft, that is the question.

away at the recent SAE danceathon.

2. Piek up your paeket, fiil out orange information sheet, green fees cards and auto registration card. (This was done by hand in ink) Approx-

imate time required 0-t0

minutes 3. Proceed to sehool of your major to see advisor. (Here you presented your advisor the list of elasses you desired if not done earlier - and he either approved or disapproved your list) Approximate time required: 0-45 minutes.

4. After seeing advisor, see a typist to have class schedule typed out. Approximate time required: 0-15 minutes. 5. Proceed to Fleidhouse to pay fees and wait in line. Ap-

proximate time required: 0-45 6. Get I.D. eard made by eampus photographer and validated. Approximate time

required: 2-30 minutes.
7. Proceed to "arena" and go to tables marked with courses needed. State section number you desire and pray that that section is open. If it is not, advisors are avallable to change your schedule. Approximate time required. 5 minutes - 2 hours (sometimes

Congratulations, you are now enrolled in classes at the University of Tennessee at Martin.

"Students seem to like the present system (computer registration) but some pro-blems do arise," McClain said, "Any weaknesses found in the present system will be reported to the Registration Committee.'

David Griggs, one of two SGA Congress members on the Registration Committee, stated that questions have been raised by the administration regarding the advantages of the present computer system due to extra paper work and time-consumption involved with this type of

"If the administration finds that the students don't care they will try to go back to the old system," Griggs said.

Computer registration for Fail Quarter will be held May 14th through 18th and May 21st through May 24th. Summer registration will be from May

close to his own home the Ohion County school con-solidation. "I wrote on the school consolidation and tied it in with busing," said Griggs
"The title of the essay was

A requirement for all scholarship applicants is that they have two years of un-dergraduate work remaining However, the first scholarship winner, Stafford says, "my award money is going to pay the first two years of law

The scholarship will pay the winner's tuition at the school of their choice, but both UTM recipents have chosen to remain at UTM

"I'm gratified we have two Truman fellows and it's a pleasant surprise to compete so favorably in the national competition," said Dr. Mosch. "It's to these boys character to stay at UTM when they could have their tuition paid at schools like Harvard or Yale."

Having two Truman scholars in three years required cooperation and teamwork. "It can be contributed

partly to the excellent work done by Dr. Mosch and the UTM political science department," said Stafford. 'He has a complete dedication to his students and his work.

Griggs said, "Dr. Mosch and the Chancellor deserve a

great deal of credit for me receiving the Truman scholarship

Presentation of the award will be made in Independence, Mo May 6 by Margaret Truman, the 33rd president's daughter. Many Missouri dignitaries will attend the impressive ceremony at the Truman Library, according to Dr Mosch.

"There will be a reception after the ceremony,"

Sunshine and Showers

As is usually the case during Spring Quarter, UTM has been blessed, so-to-speak, with a variety of weather. Last week, for instance, the outdoor activity increased immensely as an abundance of sunshine and high tem-peratures found their way onto the campus. Lately however, such activities have been held to a minimum due to the rains which have been almost constant since the

Atrium Hall to close due to rising cost of housing

By STEPHEN WARREN News Editor

The administration will close Atrium Hall next year unless an alternative way to hold down housing rate incording to Phillip Watkins, vice chancellor for Undergraduate Life.

"The main reasons for this are increasing utility rates and decreasing enrollment of students living on campus," said Watkins.

Energy cost for residence halls have increased 27 percent this year; a 21.4 percent increase is expected next year Hall supplies have increased 12 percent.

'Housing comes under heading of auxiliary exeducational and

general expenses are paid in part by the government. llousing must be self-supporting," said Watkins.

"Enrollment has stayed up at UTM, as opposed to the nationwide trend, but this has been due mainly to increased graduate programs. Graduate students usually don't live on campus.

"Our enrollment has stayed up, but our residents on campus have steadily declined."

Watkins said that Atrium is the most expensive dormitory ton campus to operate per student space.

closing Atrium the other dormitories on campus would be fuller, and therefore, operate more efficiently and

Atrium is classified as type D housing for juniors and seniors only.

'We have only received 83 housing applications requesting Atrium next year." stated Watkins.
Atrium Hall will accomodate 316 studentsw when

operating at capacity.

The closing of Atrium will

leave five student dormitories open on eampus: McCord. Austin Peay, Ellington, G-H, and Clement.

Watkins said Undergraduate Life officials met with members of the housing office and decided that there would have to be a subastantial increase in the housing rate next year, or Atrium would be closed

living there would have to pay \$375 per quarter, and all other students living on campus would have to pay an extra \$30

per year.

'We decided that that closing Atrium would be fairer to the students and would be the more popular choice," said Watkins.

Students who made Atrium their first choice on their housing applications for next fall are asked to contact the housing office to indicate their second choice.

Watkins said that these students' new housing applications will be considered

Atrium stayed open students turned in by the April 9

Stacy slated for speech Dr Garner Staey, president

of the 100,000 member American Chemical Society will speak on "Energy Pro-blems and How Scientific Societies can Help" Saturday, April 28 in room 201-3 of the University Center.

"Dr. Stacy is definitely a leader in chemistry today," says Neil Green, chairman of the meeting. "We are very lucky to have him on campus and would like to invite the processed with all other appublie to attend his 1 p.m.

winners will advance to the

Special Olympics winners advance to Peabody

By MARCELLA STRAND Staff Reporter

"I like Special Olympics because I get to meet lots of people and be in the parade. "I didn't think I'd win but oider people told me I could. And I won."

'Older people have such interesting stories to tell. They get as excited as we do when we win."

These are some comments from the participants of the sixth annual Special Olympics Day at UTM's Pacer Stadium on Friday, April 20.

More than 300 mentally retarded persons from Benton, Carroll, Gibson, Henry, Lake, Obion and Weakley Counties participated in the spring games at UTM.

Track and field swimming and gymnastics were the main events after the parade of athletes, the Special Olympics oath and the lighting of the Special Olympics torch.

Volunteers for the activities included more than 275 students and several area high school students, according to Bettye Giles, director of Athletics and director of the event.

"A great deal of credit for the success of Special Olympics Day must go to the volunteers," Giles said.

Scotty Smith of Middleton, physical education major, was chairman of the swimming

"I have really enjoyed working with the kids from the Easter Seal Center in Martin," Smith said.

lligh School students from the area helped with activites as well. Members of the Distributive Education Clubs of America (DECA) and The Tennessee Office of Education (TEOC) offered Club assistance and en-

couragement to contestants. Donna Weston and Shane Rowlett of Martin said they especially enjoyed helping Special Olympics participants meet more people.

"I'm really glad I could help nese klds," Clare Dement, South Fulton, said.

Special Olympics are sponsored by The Joseph P. Kennedy, Jr. Foundation, the Tennessec Department of Mental Health and Mental Retardation and the UTM department of physical

education and health. They are made possible by donations and help from civic

and campus organizations Winners from Area VII events will go to the Tennessee

State Special Olympics meet at George Peabody College in Nashville, May 18-20. State

port, N.Y., Aug 8-13.

THE PACER

Insight

The Pacer staff decided the topic of the draft verses the volunteer Army was a divided issue

Registering for the draft is best solution for a war

"If the Russians start a conventional war In Europe, if it doesn't quickly escalate into a nuclear war; if NATO airfields and ports are not destroyed in the opening battles; and if we can build an enormous navel fleet that does not ow exist, then the million men stationed in the United States will be useful in the next war

The preceding paragraph was taken from an article printed in last week's issue of The Pacer, entitled "The Draft la Inevitable" The article also went on to state that the above premises are clearly absurd. But are they? It is this way of thinking that made the Vietnam conflict an absurdly long, drawn out, half-assed war. The draft is not the killer of freedom,

For some obscure reason, war is a way of life, has been for as long as anyone can remember, and probably always will be. Nobody argues that it's not wrong, and nobody will deny that war is hell. But let's face it, it seems to be here to stay, and the only thing to do is bite the bullet and drive on.

In otherwords, accept it; then do something about It. Looking the other way, pretending it doesn't exist, hoping that if we do nothing, then they'li do nothing, is a fool's dream. And like a fool, anyone believing in this philosophy is considered fair game by those who don't. Namely, the majority of the world's population The meek may inherit the earth, but only the

strong will be alive to see it happen The volunteer army is good-In theory. Unfortunately, theory doesn't always work. In the event that armed forces are needed in a hurry, registering for a potentialdraft is the best solution. If the United States suddenly gets

The draft is immoral, unetbical, and above

ail else, inherently and undentably wrong. As a matter of fact, any person, organization, or

other auch institution which seeks to force other individuals into conformity with their

particular system of values is always wrong. It's as simple as that.

If the draft is reinstated, as it probably wili

make such decisions, the happiness and well-being of countless individuals will be needless-

By and irreversibly affected. The needs and

desires of the individual within society should

always supercede those of the remainder of the

group. People should be allowed to live their

Aves in peace and make their own decisions

about the role of the military. To force someone

To fight for freedom is self-contradictory and

No ideal, concept, or principle is worth giving up one's life for. Even worse than this is the no-

In that people are required to support a cause that they may not really believe in or even understand. No one should be compelled to

ngage in any activity to which they are not

totally eommitted. We've been hearing since

we were old enough to understand that the com-

munists are bad and that all they want to do is

rome over here and take our rights away. What we fail to realize is that the draft would do a

great job of accomplishing that goal without

ever having to worry about the communists

The U.S. government is teiling us that THIS is

The UT System should be congratulated for

sing use of heating and

ownright absurd.

lemneratures

large numbers of people are going to be needed, and fast

Military thinkers estimate that the next war will last less than a month. This comes from the Yom Kippur war between the Arabs and the israelies. Either they'll kick hell out of us in a hurry, or we'll kick hell out of them in a hurry

The problem lies in the fact that it takes approximately six months to set up a draft, draft someone, process him, train him, and put him on a battlefield

If we hope to stay the United States of America, the two obviously are not compatible.

if the Russians start a war, or anything else happens, what will happen to the million men already in the Armed Forces? Do we just sit back and let them get blown to bits, without even trying to help them? Do we just say, "Oh, well, they enlisted of their own free will," and leave it at that? Do we ignore the fact that they're over there, or here, or wherever in the world the next war is, fighting for you, me, God, apple pie, and everything that's ever mattered, or been believed in?

Sure, nobody wants to give up his freedom, even temporarily, to fight in a war that he doesn't necessarily feel is justified. But isn't it better than giving up your country, your family, and your personal ideals for the rest of your life? Granted, you can get killed In a war; ou can also get killed crossing the street in front of your house.

The draft is not perfect. It's not the ultimate answer, either, but then, war is not the ultimate question. However, for the problem that a potential war creates, registering for the draft

War and draft is wrong right and subsequently THIS is worth dying for.

> War is wrong. And since the military is in existence for the express purpose of engaging in war, then the military cannot be seen as being completely biameless either, if we truly live in a democratic society, then let those who want to have a war go fight it. Leave it up to the people to decide for themseives what they want to The circumstances may change and the armles may be fighting for what someone sees as being the noblest cause in the world. So what It's still war, an abstract concept actualized by se who somehow feel they have the "right" to dictate to others what is best for them.

For a person to die fighting for a cause he killed in a bar room brawl. in a sense, the per son who is killed in such a situation is more what everything is about. In essence, however, there is no cause so great or no cause so noble as to force someone to give up his ilfe and hap piness in pursuit of it. People should live in the present, always remembering the past and looking to the future, but living in the here and whatever happens, If it were only s

it really doesn't matter to the government whether or not we really believe it. We are just supposed to accept it and go along our merry How stupid.

doesn't really believe in is no nobier than being justified. At least he has some understanding of now regardless. Do what you feel is right, and not what someone tells you is right, in this way, you'll have no one to biame but yourself for

Taking adventures

Detouring

In the secluded world of the college atudent it is easy to neglect the finer, and, luckily. often inexpensive, things in life Ali that is required is a sense of adventure and a little spare time (having access to a car helps, as does having a few fellow adventurers) The trick is to be able to gutitlessly ting that physics test at 8 00 tomorrow morning) take off to parts unknown, or at least as far as Fulton. Having some obscure pur

pose in mind helps the impulsive adventurer in hia travela, be it ilquor, members of the opposite sex, or a Big Mac This heightens the senses and heips guarantee a fine time. In addition, if your car has a flat tire in Memphis. and you are supposed to be studying in Martin, you have some semblance of an excuse Mumbiing, "I was just mess-ing around," into a pay phone at 2 a.m. just doesn't sound as good as, "I am dedicating myself to becoming a weil-"I am dedicating by Pamela Allen

rounded individual "

If you lack automotive motivation, there are alternatives that, while not exactly warranting of home movies. w i bring an enjoyable time There are midnlght tennis raids held frequently on the lighted courta, frenetic treeclimbing after dark in the Quadrangie, and the occasional beer bottle tossing con-test into the University Center dumpster A ilttle intensive thought should produce more original ones that you can do on your very own (or with a close, personal friend)

Whether on the open road or in your own campua backyard, there are so many interesting, adventurous aiternatives to be explored. Take some time and think about it. the next time you head to the ail-night store for some brew-pops and a pack of Twinkies, try a detour through Sharon, or maybe even Bradford-Doodle Soup capitol of the world.

Buck Rogers in the 25th Century

Movie Review

There comes a time when every reviewer has to agree with his Grump. It's not very nice. Who wants to agree with a bad tempered out of work demon? But this time there is no avoiding it when it comes down to "Buck Rogers and the Twenty-fifth Century".

One of the perpetuors behind this nightmare is Gienn A. Larsen, the same evil mind that launched "Battlestar Gaiactica." in this revival of Buck Rogers, Larsen worked on the creenplay, produced it, and did various other nasty things to one of our dearly beloved serial and pulp characters.

This version's piot runs something to this effect. Buck" Rogers is an astronaut who is put into space. His vehicle runs into some kind of technical difficulty and Buck is put into suspended anima-tion for roughly five hundred years, though the opening se-quence makes it appear that he's only stoned that long. Either way you look at it, it's a long trip. He is revived aboard a giant space ship being run by some very nasty allen types who are all beautiful princesses, slave girls, or giant Russian cossacks. These people are on the way to Earth aupposedly to negotiate a peace treaty, though they are

realiy planning to do some dirty work They spend the entire movie playing Buck back and between the mean treacherous ailens and the nobie Earthlings who don't trust anybody as dumb as Buck.)

Gli Gerard plays Buck Rogers, and there is some doubt in my mind that he plays it the correct manner. Gerard's Buck Rogers is not only dumb, but he is a com-piete idiot. He's even dumber than Lee Majors' Steve Austin, and that's going some. He does have several thinga that qualify him for the hero role though. Ile's strong, handsome, and chauvinistic. role

Henry Siiva is about the best actor invoived, though how he got involved is a mystery to me. He does have a choice role though. He plays Kane, who in this version is a former Earth citizen who is now a member of the alien emperor's court and is planning to seil out the pianet of his birth. In the original Kane was named Kiiler Kane and he was an old time Earth mobster who was seiling out Earth. This recent atiempt aimost makes Kane iook respectable. Sliva plays the part nicely, and since the viliain is so much more inteiligent than the hero you might easily wind-up rooting for him.

The special effects aren't very hot. Most of them are on the same level as the worst of Battlestar Gaiactica", but there are a few moments where they do shine. The greatest problem with the special effects is that ail the space ships and hardware looks too damn new. One of "Star Wars" better assets was the fact that ail the hardware looked like it had been used and therefore increased the amount of versimilitude. With everything looking all spiffy and new in Buck Rogers we lose another element that keeps our suspension of disbellel up

There are a few bright spots in the movie. One of the best

Buck and his robot companion go waiking through the radioactive ruins of South Chicago after dark and wind up getting chased by mutants. Come to think of it though, it isn't too safe to walk through South Chicago nowadaya either.

by Dan Webb

Another amusing bit is a futuristic dance which I swear must be a cross between the minuette and disco dancing. it looks very involved and intricate, but our hero picks it up in no time.

The movie has it's fun bits. but it's not realiy worth sitting through the sehlock to get to them. Pick up a seience fiction book instead. It's cheaper and if you pick up the right one probably better written

Next Time

On this warm, April morn l sit and analyze my heart.

Feeling abused, betrayed, and Confused- It doesn't help to Ask the question why.

Unexpected phone calls in the Middle of the night-Leave me with a heartache to Work out for myself.

Despite all my pride, l know deep insidc-My feelings are reat, My feelings are strong.

Love is a risk. Love is a ride Sometimes I think love is just Like suicide.

'Stupid to complain'

Wizard's Words

In last week's edition of The once again confronted with the fact that "Ignorance is bliss."

the two articles written by Robert Meyers concerning the quality of the food in the UTM cafeteria in comparison to Morrison's cafeteria, and an editorial about the SGA which vas printed in a recent edition of The Pacer.

I am certainly happy that Meyers found a place where he could gorge himself on \$4 while also getting a chance to look at a carpeted floor. I respect your opinion, Robert, which is that you think of the cafeteria food as substandard. also agree with the reply given by Mr. Broderick's assistant in regard to your complaint. If you do not like the food served here why do you eat here? Surely there is ome other place besides Morrisons where you could eat, drink, and be totally satisfied. In fact, a lot of people enjoy such establishments as McDonalds, and Wendy's even though there Isn't any carpeting on the floor. Try something else, because it is stupid to complain about the UTM cafeteria and then eat here.

I totally disagree with your closing statement in your article which sald "I believe that If something positive is not done this quarter, the

students in protest of poor food table." This statement shows irresponsibility on your part Do you honestly think anything will get better if all the students who did not like the cafeteria food left their trays on the table? I agree that the food is not always the greatest but It is pretty good at times and I personally do not want to sit down at a table where there are a dozen trays sltting around Not only is It disgusting looking but it can also be very unsanitary. I do not know what your problem is but I think you need to sit down and think serlously about a subject before going out and making a fool of

yourself by saying something that is totally contradictory. your other prosalc masterpiece, your letter to the editor about the SGA was kind and considerate toward the SGA members but it also made some freshmen and transfer students feel Inferior. Some of the reasons given for a nonexistant Faculty Hand-book were: (1) it would only benefit the freshmen; (2) by the time it was published the freshmen would already know which teachers to take; (3) the deficit in SGA funds at the beginning of Fall Quarter and the fact that there were some t things written in the handbooks which caused hard feelings on the part of some

by Dorothy Bock

All of the reasons are sound but you made a mistake when you said it would only benefit the freshmen. There are other students such as transfer students who do not know anything about teachers except from what their friends tell them. Upperclassmen might also have difficulty choosing a teacher if they

If some way could be devised to prevent students from writing uncalled for things In the handbooks and if the SGA could come up with some money raising projects, than maybe a Faculty Hand-book could be published and

all the students would benefit.

Rockin' round the clock...

Dancing the night away helps in fight against MD

By SUZIE BRONK

Assistant News Editor The fourth annual Sigma Aipha Epsilon danceathon benefitting Muscular Dystrophy ended Saturday night with ten tired and proud dance couples and a record \$4,400 pledged.

The dance marathon started at 6 p.m. on Friday, April 20 with 16 couples. A small cheer-ing section accompanied the dancers during most of the event. The crowd was especially large around mid-night after the downtown nightspots closed.

Each couple was sponsored with pledges for the duration of their dancing These pledges are used by the judges to determine the winners.

"First place was captured by Alpha Gamma Rho with \$1,225. The winning coupic from AGR was Lisa Rainey

and Bob Bauchmann Gamma Sigma Sigma placed second with \$577 and Sigma Kappa was third with \$286 ' said Allen Curtis, SAE chairman

"The standings will not be final until the pledges are coi-iected and turned in at the SAE House. This must be done sald Curtis. "Everyone who danced worked together and made it a joint effort. I'd like to thank them hours worth of stress '

The winning couple will receive two ten speed bikes. AGR and GSS are entitled to a night free at the Oz for their members and their dates. They also each receive a keg

"It was a lot of fun and it was definitely an experience, sald Shelia Hudson member

of the SAE dance team. "]'Il again though. It's a lot of work when it's over," sald Hudson.

"The main sponsor for the danceathon who deserves a special thanks is Tom Lattus of Latte Distributing Co. He helped us a lot with the public relations and he donated the trophies and the beer. We'd also like to thank Wendy's llamburgers of Union City and K&N of Martin for the food they donated for the dancers and Gibson County Tractors and Walmart for donating the ten speed blkes," said Curtis.

"Alpha Phi Omega was glad to provide our musical services to the SAE's and congratulations on another great danceathon," sald Chris "Wizard" Armstrong, an APhIO soundman for the

Baseball camp scheduled: individuals, tor groups

Individual and group in-struction in the fundamentals of baseball will be offered to people from 9 to 13 years of age during the UTM Baseball Camp, June 4-8.

According to Vernon Prather, UTM head baseball coach and camp director, the five-day camp will feature the aspects of the game of baseball.

"We are looking forward to a good camp this year," Prather said. 'Each day there will be instruction on the proper way to field, throw, pitch, catch, and hit.'

Campers will meet daily from 9 a.m. to noon at the UTM baseball field. Prather

Promote Women Conference...

IcCoy keynotes careers

never be a point in your life where you will feel you are a success," Carol McCoy said to approximately 300 people attending her keynote address at the Promote Women Conference Tuesday nference Tuesday But long as you set standards and stick to them you will be a

McCoy, an attorney practicing in Nashville and a member of the Tennessee Commission on Status of Women, spoke on the topic "Lifestyles and Careers" About herself she said her work is rewarding both personally and careerwise

"There is a tremendous amount I have to learn," she says about her long working

quet, which was attended by

all Martin secretaries and

"Easter Sunday and Sunday "Individually, there will is the first time I took off

McCoy said there are several things you must ask yourself when planning a

"What is it that you want" What are you willing to give up to get where you want? How do you plan to enjoy what you achieved? What will you do if in the process of earning an education you become pregnant? Being a parent is a job for the rest of your life and it should be included in the unexpected demands in career planning."

Saying there are rewards in different areas of a job as there is with parenthood and being married, she said some job benefits include expense accounts, apartments entertainment

counts, insurance, and cars

with chauffers.
According to McCoy there are several things a professional must be aware of when accepting a position and while on the job.

'You must learn the informal rules of entering the job market. And avold becoming involved in office gossip," she says. "Find the leaders and role models because you need someone you can follow. You must be

able to let your employer know your qualifications and worth- show you deserve the tob and advancement You must determine the longevity of your job and see that a promotion will not always

furthering your As to how to determone what being a success is McCoy says. "It is easy to decide what success isn't and what power isn't It is hard to decide what it is." She recommended Jane Trahey's

book "Women in Power" as a

guide to career planning and

how to be successful.

Elizabeth Smith, consultant for the Tennessee State Department of Education and member of the Tennessee Commission on Status of Women, gave the wrap-up talk after the workshops and the luncheon.

"No woman is not in a career-each of us is a homemaker," she said. In the different workshops I heard continual reference to managing the other career of homemaker.

In summing up the con-ference Smith listed four ference Smith listed four Nashville before becoming turned out, but disapoints that were important to Assistant Commissioner of the college turnout.

"You must have a goal-a career plan The career is the fruition of planning "
"You have to adopt what

you see to your plan You need to adopt a mode of dress as Adopt a certain atlitude, and a mode of speaking to the situation 'you shouldn't feel you are abandoning the self by adopting what is accepted '

"You must adapt your career plan to flow with the

"You have to cvaluate what you have done and whether the plan was suitable And you are going to have to stick your neck out sometimes to tell someone they are wrong and to take a risk to change

Billie Ann Pace, director of women's activities and cn-cordinator of the con-ference, said of the con-ference, "We felt like we had excellent speakers. We were specially thrilled to have Martha Olsen make her last official visit as executive assistant to the Chancellor of the University of Tennessee at

Tennessee The conference committee members met their responsibilities as they usually do and we would like to thank the ATO's for their hospital ty and allowing us to have our reception at their

Bonnie ilice, coordinator of Placement and co-coordinator of the conference, said about the small attendance of UTM students,

'l was extremely disap-

pointed by the very low if nonexistent attendance of the college women. It bothers me bacause it is one of those missed opportunities they will really regret in the future. We had some really outstanding women from various careers who were right here on campus. Students didn't have to make any effort to hear

them and they just didn't come. There is no way better to get ideas for how to get a job but by talking to people in the jobs. I was real pleased to see the high school students here.

I was pleased with how it turned out, but disappointed in

Energy audits conducted; potential savings identified

Energy audits conducted by specialists from the University of Tennessee have identified potential annual savings of nearly \$2.2 million and lifetime savings of \$32.5 million, a UT offical said to-

day.
Dr. Charies E. Smith, vice president for public service, said the savings figures are detailed in energy audit reports prepared for local government and Industrial officials in Davidson Henry and Suilivan Counties.

"The 226 audits began in iate 1977 and ended March 31 of this year," Smith sald.
"They were conducted by specialists from three UT public service agencies as part of the overall Tennessee Energy Authority Energy Ex-tension Service pilot pro-

Speaking to the Parls Rotary Club, Smith said the UT energy audits uncovered potential annual savings of \$86,436 in the 26 public buildings inspected in Henry County and \$105,000 in the County and \$195,000 in the private business audited

"Our figures for Davidson County showed annual savings potential of \$844,063 in 48 public facilities and \$552,000 in the 60 private structures," he sald. "For Sulilvan County, the possible savings total \$307,704 annually In 50 public buildings and \$133,000 in the 27

private structures."
Smith said the audits were

Center for industrial Services.
County Technical Assistance
Service and Municipal
Technical Advisory Service.
The latter two agencies
were responsible for the city/

county institutions portion of TEA·EES, while the Center audited small business and industries in the three counties.
"The \$32.5 million lifetime

savings figure represents potential savings in the public sector only," Smith said.

He added that the three city/county specialists estimated that the full lifetime figure could be achieved by spending \$1,836,942 for capital improvements in existing facilities, an amount that would be recovered in less than two years based on savings projections.

"The \$2.2 million annual figure represents a potential payback of more than \$6 for

payback of more than \$6 for every taxpayer dollar spent on these components of the TEA-EES program," Smith said. He added that a payback of more than \$180 for every dollar spent was possible if all of the lifetime savings potential was reached.
"I believe you must agree."

"I believe you must agree with me that few federallyfunded programs can claim they can save the taxpayer money," he said. Smith said the first phase of

the pllot program has ended, but additional federal funding

will continue the work through Sept. 30, 1979. Weakley and Washington Countles have replaced Henry and Sullivan Counties in the governmental portion of the program. In the small business sector, the program have been expended to positive the program have been expended to program have been expended to program have been expended to program the program have been expended to program have been expended to program have been expended to program the program have been expended to program have been expended to program the program and the program have been expended to program the program and the p gram has been expanded to ail 95 counties.

"Funding for the TEA-EES program beyond September 30 Is unclear," he said. "However, we would like to believe that the federal government will provide the level of support needed to have the same type of impact throughout the state.

Smith said continuation and expansion of the program were particularly critical as a result of rapidly escalating energy costs and predicted shortages.

Employment position available

Do you need employment? A position has become available in one of the local Veteran's Affairs Office.
